

Powering Change Through Renewable Energy Development

WRB
ENERGY

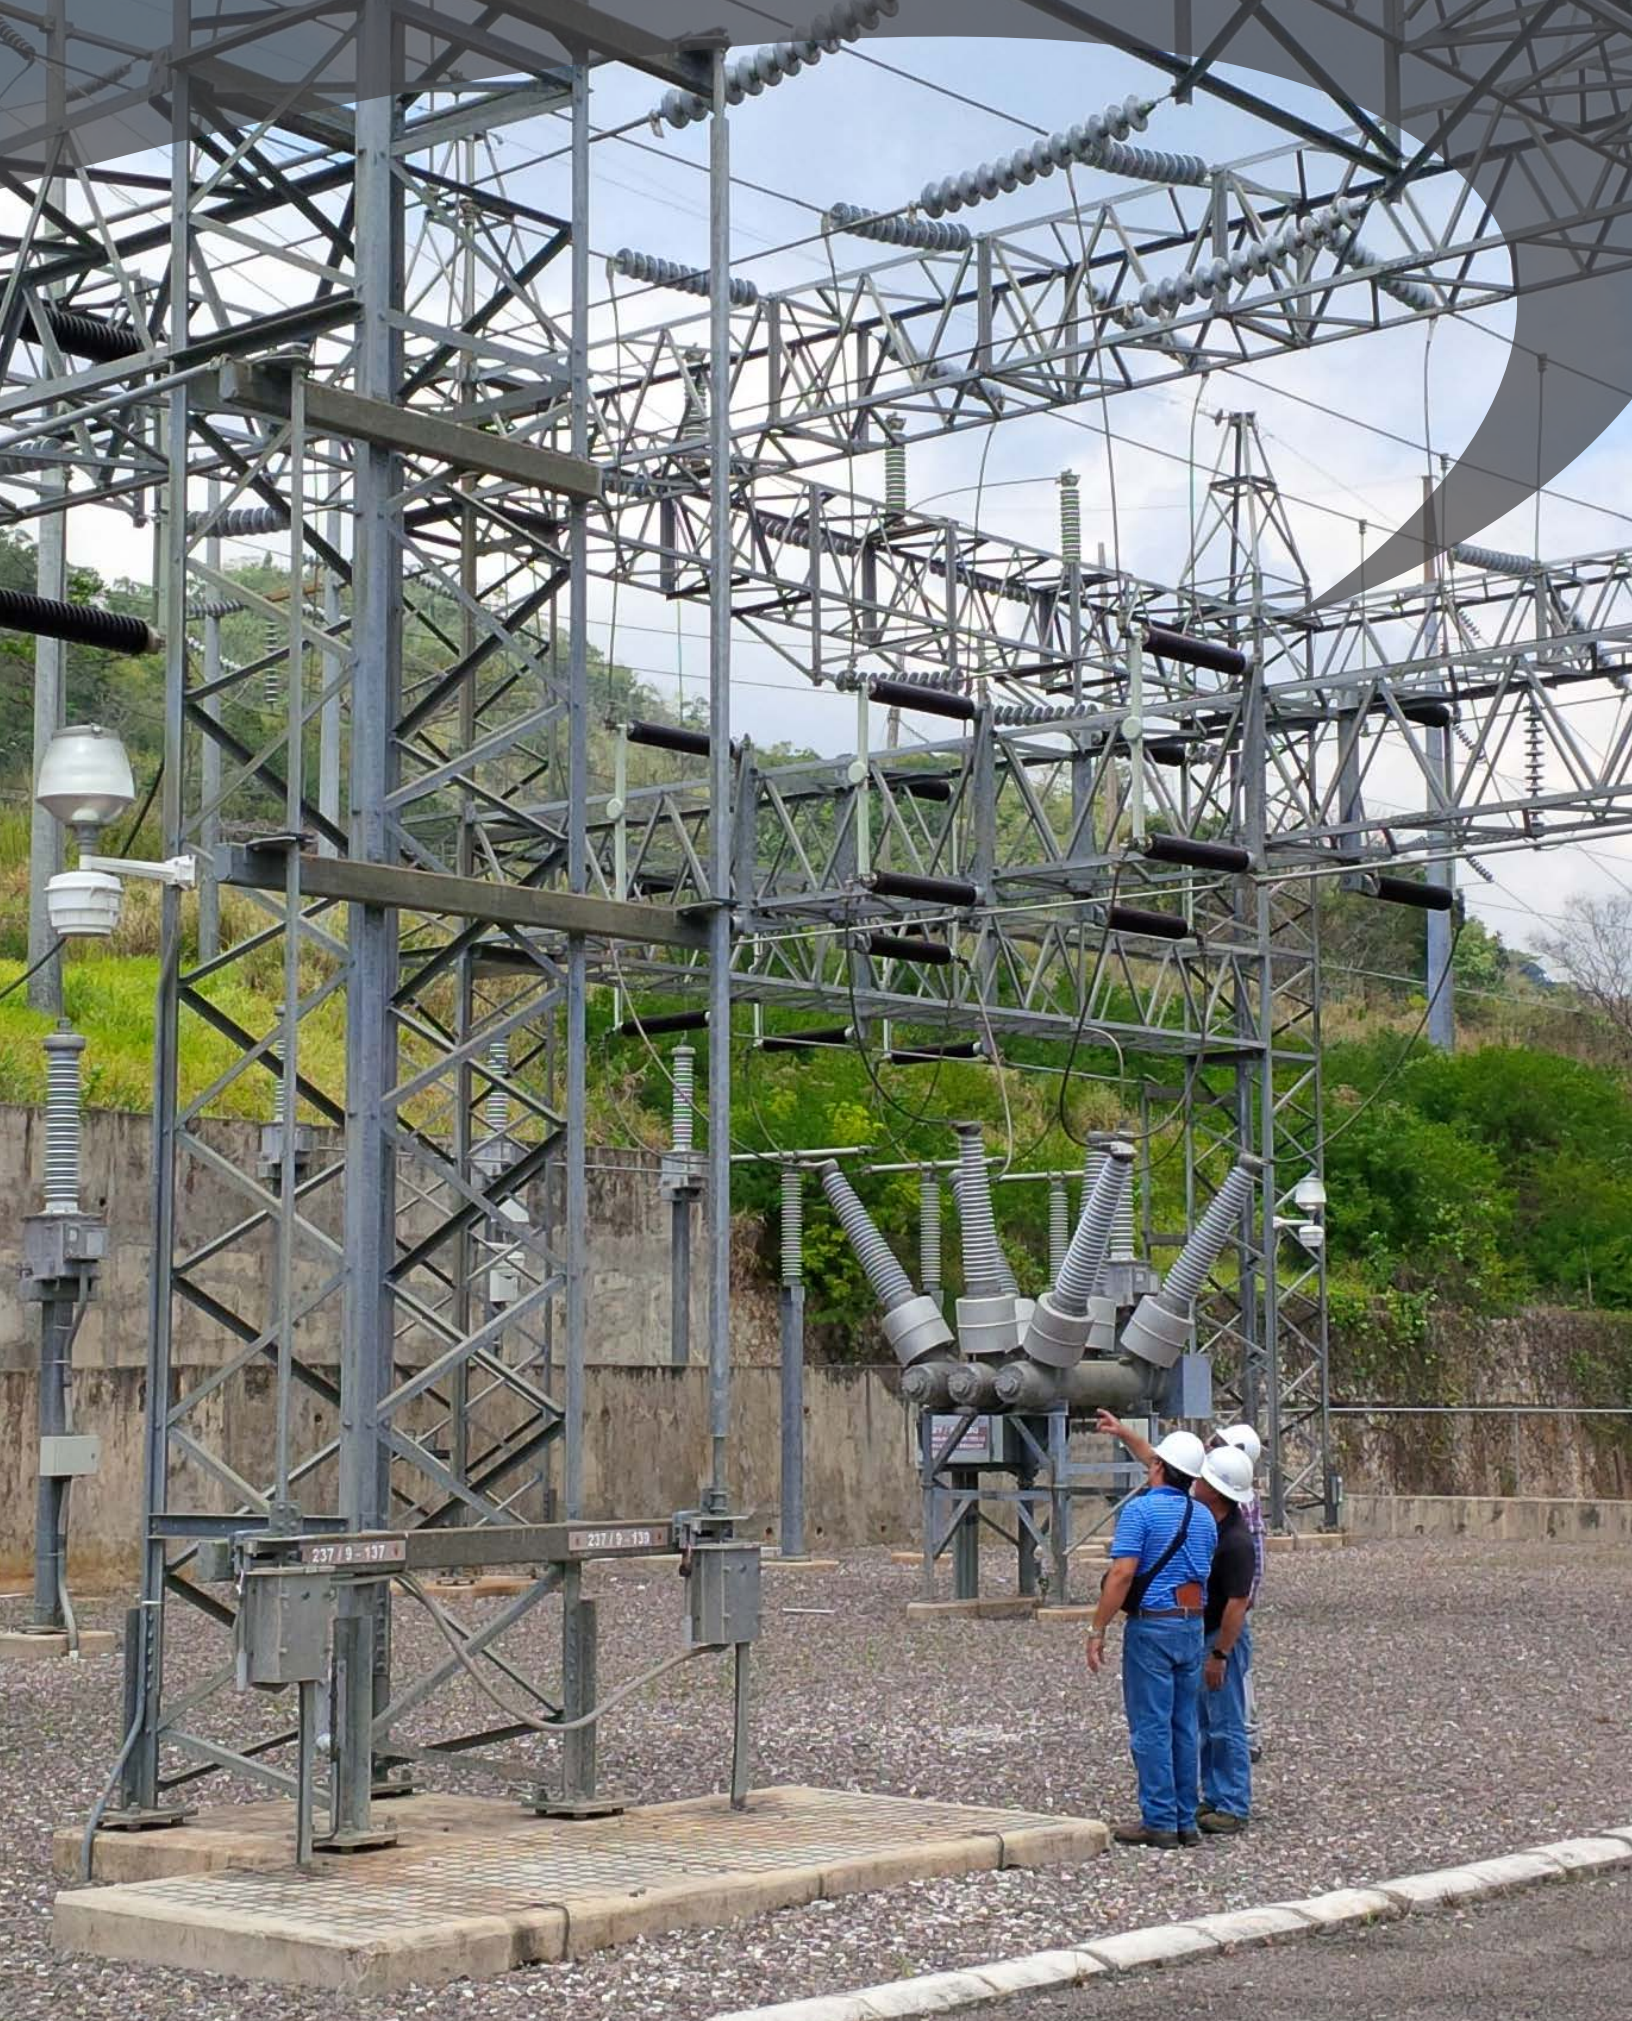

Building Sustainable Energy Solutions in Latin America and the Caribbean

With decades of proven experience, we develop renewable energy projects best suited to the region — from site selection, design and permitting to financing, construction and operation.

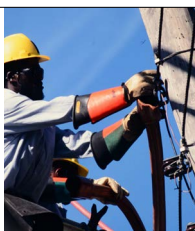

Our History

WRB Energy's parent company, WRB Enterprises, has more than a half-century of operational experience in the energy, utilities, and financial sectors.

1982

Formation of Turks and Caicos Utilities; sold in 2014

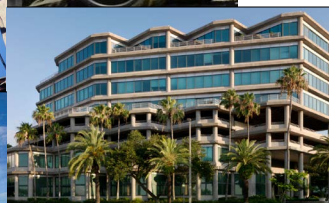

1952

Began as Caterpillar dealership with operations in the U.S. and the Caribbean

1988

Charter shareholder of CenterState Bank, Tampa

1984

Charter shareholder of Bank of Tampa

1994

Majority shareholder and operator of Grenada Electricity Services (Grenlec), a vertically integrated utility

1990

Formation of Turks and Caicos Environmental Services (water desalination); sold in 2014

2013

Founding of WRB Energy, renewable energy development firm

2004

Acquisition of Dominica Electricity Services (Domlec); sold in 2014

2014

WRB Energy's 28 MW Content Solar PV project wins Jamaican renewable energy tender

2014

Creation of WRB Serra, renewable energy and sustainable infrastructure investment fund

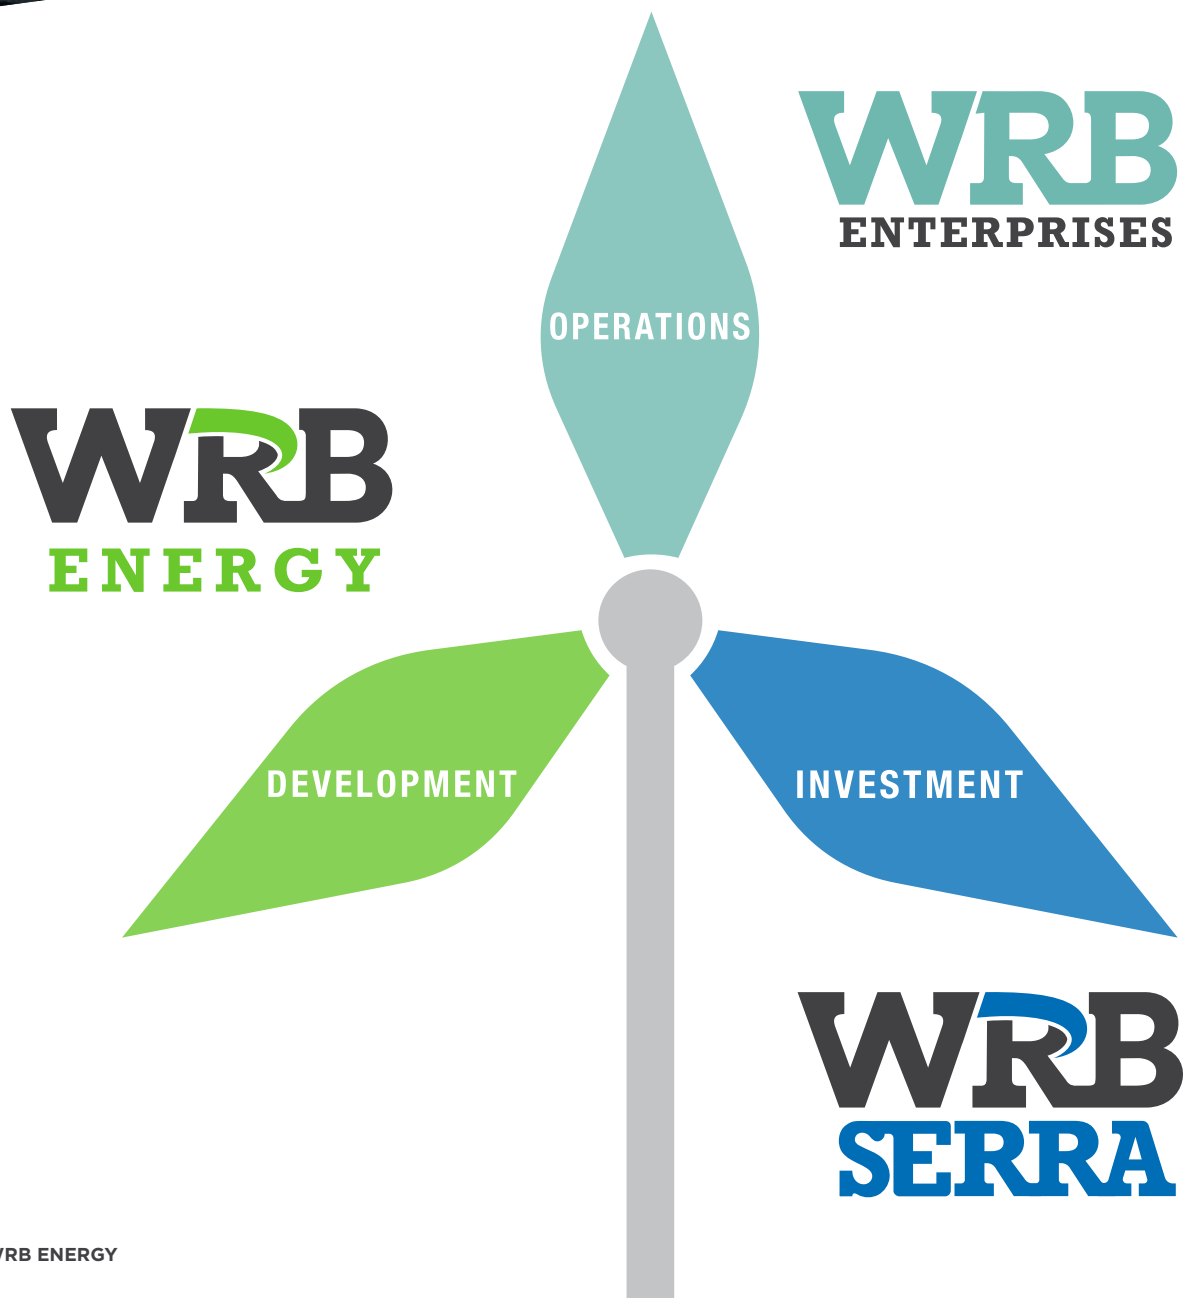

2016

WRB Energy commissions Content Solar Plant, a greenfield development in Clarendon Parish, Jamaica

Partners

WRB Energy is part of an integrated family of partner companies for Renewable Energy Development & Investments.

A high-angle, slightly blurred photograph of a person's hand in a blue shirt writing on a document. A white coffee cup is on the desk next to the document. The background is a light-colored desk with various papers and a black object (possibly a phone or tablet) visible.

WRB ENTERPRISES

Providing energy, environmental,
and financial solutions.

WRB Enterprises is a family-owned, privately-held company with businesses focused on renewable energy development and investments, utilities, water treatment services, telecommunications, commercial banking, real estate, machinery, and power generation equipment.

Creating value that's good for business, the community, the economy, and the environment is fundamental to how WRB operates.

DIVERSE ENTERPRISES

Spanning a half-century of experience.

Power Generation & Utility Operations

Electricity generation/operations and telecommunications.

Renewable Energy Development

Projects ranging from greenfield to mid- and late-stage assets.

Energy Investments

Providing sponsor equity to finance renewable energy projects.

Real Estate & Community Revitalization

Investments in commercial sites, residential properties and ranching.

Water

Desalination and environmental preservation services.

Community Banking

Charter shareholder of Bank of Tampa and CenterState Bank.

Markets

U.S, Caribbean, & Latin America

A large red concrete mixer truck is pouring concrete into a deep, rectangular foundation pit. The pit is lined with rebar. Several construction workers in safety vests and hard hats are standing around the pit, observing the process. The background shows a clear blue sky and some distant trees.

WRB SERRA

Investors in renewable energy,
energy efficiency and water
infrastructure.

WRB Serra builds equity in our environment through prudent, sustainable investments in the Caribbean and Latin America where our team has experience and relationships with local partners.

We provide capital that allows developers to take their projects from concept through completion.

INVESTMENT CRITERIA

Investing in infrastructure with defined characteristics.

Target Sector

Renewable energy, energy efficiency, and water infrastructure.

Investment Size

Equity investments of US \$7-30 million.

Asset Size

Utility scale projects or portfolios of distributed assets.

Investors

Family offices, institutional investors, and multilateral lenders, including the [Overseas Private Investment Corporation](#) that helps American businesses invest in emerging markets.

Investment Stages

Equity investments made at stages from financial close through operating projects.

Cash Flow Stability

Long-term offtake agreements or leases; or in the case of integrated utilities, operating franchises with at least 30 years remaining.

Investment Structure

Majority ownership or significant minority investment with operating control.

Markets

Caribbean & Latin America.

WRB ENERGY

Powering Change — Diversifying
energy portfolios through
renewable energy development
for a sustainable future.

WRB Energy provides renewable energy solutions to help stabilize electricity prices and reduce dependence on imported fuels to drive economic growth and sustainability in Latin America and the Caribbean.

Decades of regional experience in developing renewable generation prove that our projects deliver results and are good for the local environment.

We help diversify energy portfolios at any stage of the project development process: site selection, financing, construction and operations.

SUSTAINABLE ENERGY SOLUTIONS

Delivering results throughout the project life cycle.

Market Selection

Caribbean & Latin America.

Development

Projects at any stage of development are completed on time and on budget for long-term value.

Design & Construction

Designing the right project for the right environment is critical to maximize returns for investors, while delivering the lowest cost of energy for customers.

Financing

WRB Serra provide sponsor equity to finance stand-alone renewable energy projects and integrated utility investments for sustainable, long-term returns.

Operations

The WRB team has operated integrated utilities for more than 30 years, with responsibility for generation, transmission, distribution, and renewable energy development.

WRB Energy

Markets & Technologies

From greenfield development to operations, WRB Energy manages the entire project life cycle. We select the right technology for each project opportunity for the region, including wind, solar, small hydro, geothermal and energy storage.

Featured Markets

Utility-Scale Projects: Jamaica

WRB Energy developed the 28 MW Content Solar PV installation in Clarendon, Jamaica. On time. On budget.

Featured Markets

Distributed Generation Portfolio: Mexico

WRB Energy is executing on a 100 MW portfolio of residential, commercial, and industrial PV assets across Mexico.
